

ArcticStar 55SIP

The Simplicity You Want - The Technology You Need
With SIPneo3 Automatic Sanitisation

- Available as a bottled or POU water cooler, including floor standing or table top options
- Ambient & chilled water and hot & chilled water options
- Hot water booster raises hot water temperature to a max of 95°C for approx 1.5 ltr. (Un-boosted temperature is up to 90°C)
- The Hot & cold cooler has a ECO light sensor to save up to 33% in electricity
- Manual "tamper proof" push down taps and lack of electronics ensures longevity and easy servicing
- SIPneo3 24/7 self sanitising system installed

Booster Button To
Raise The
Temperature From
90°C To 95°C

ECO Sensor Saves Up To 33%
In Electricity Costs

ArcticStar 55SIP
SIPneo3 Automatically sanitises
the floor-standing, tank fed POU
or bottled ArcticStar 55SIP cooler
overnight, every night 24/7.

Manual Taps & Lack Of Any
PCB's Or Solenoids Makes
For Easy Maintenance

How SIPneo3 Self-Sanitising System works

- SIPneo3 is a programmable ozone generator. The resulting hygiene level protects your customers health, whilst SIP sleep mode reduces their electricity bill
- SIPneo3 Automatically sanitises the floor-standing, tank fed POU or bottled ArcticStar 55SIP cooler overnight, every night 24/7
- Eliminates half of your sanitisation call outs
- By activating SIP12-hour sleep mode from 18.00 to 06.00 plus sleep mode on weekends, your customer can make significant savings in electricity
- A hot & cold cooler without sleep mode would use 983KWH per year. With sleep mode this reduces to 377KWH, a saving of 61% at 14p per KWH which would equate to a saving of £85 per year! The saving for an ambient & chilled cooler, using the same formula saves 56% amounting to £11 per year

Quality – Reliability – Integrity

ArcticStar 55SIP

The Simplicity You Want - The Technology You Need
With SIPneo3 Automatic Sanitisation

Features Of The ArcticStar 55SIP

Modern design, sturdy & reliable. Hot & cold cooler has a hot water booster button & ECO light sensor to save up to 33% in electricity.

SIPneo3 automatically sanitises floor-standing tank fed POU or bottled coolers overnight, every night 24/7

Modern, reliable, manual push down taps. Tamper & break resistant. Hot tap with safety lock

Hot water booster button to raise the temperature from 90°C to 95°C (Limited quantity)

ECO sensor turns the boiler off when the office lights are switched off. Saves up to 33% in electricity

Accessories For The ArcticStar 55

Installation rail with filter. Includes compression fitting, 1-Micron green filter, water block, copper pressure reducing valve & non-return valve

Mains drainage - connect the drip tray to mains drainage. Can be supplied with a pump, to pump the water over 50m & a rise of 5m

Filter housing with carbon block candle & nanofilter

10 litre overflow system with alarm to signal when full. (Factory fitted)

Cowling to fix the cooler securely to the wall. (Supplied separately)

A pumped main drainage system pumps the waste water from the drip tray over a distance of 100m & a rise of 5m. (Factory installed)

SIPneo3 overnight self-sanitising system can be purchased as an accessory for self-installation into your tank-fed pou or bottled cooler

3 Litre overflow kit connects the drip tray to a 3 litre alarmed overflow container. The container has a tap to empty without removing it
